

# Coracle and the Learning Line

Since 2007, Coracle has helped tens of thousands of users from 60 countries follow their learning journey

## e-Learning

We deliver text, image, animation, audio, video and game based training, on any device, in any language, at any time.

## Learning Management System

The Learning Line is a Learning Management System built on Tin Can API and our software, integrations and workflows.

## White label

The Learning Line is offered as a Software as a Service (SaaS) hosted product, in your branding.

## Any device

The Learning Line works on iPhone/iPad, Android, Blackberry and Windows mobile phones and tablets. Responsive design removes the need to download apps.

## Intelligent reports

Access real time reports generated whenever you want. Graphical reports are clear and intuitive. Download data and use it elsewhere

## Unlimited users

Invite anyone to start their learning journey in seconds. Accounts can be created using Facebook or LinkedIn profiles

## Shop at any time

Integration with the Coracle Shop is simple and puts our customers in total control over pricing, offers and who can access courses

## Test knowledge

Coracle Quiz is an integral part of the Learning Line. Flexible and simple to use, this is a very powerful testing engine

## Help!

Learning doesn't have to be a solo endeavour. The Learning Line offers social media style interactions via comments and messages, all in context with the topic being studied

## Progress awards

Customisable badges are assigned when landmarks are reached. Evidence backs up the claims that rewarding progress boosts engagement

## Integrations

We can work with mainstream solutions such as SAP, Oracle and Sharepoint. Our CRM of choice for workflows is salesforce.com

## Content

If you already have content, we can integrate it. If you have content to digitise, we're here to help. Either way, we'll help find the best using text, images, audio, video and animation.
