## We collaborate with Subject Matter Experts to design rigorous assessments.

Coracle-Quiz is a purpose-built online testing engine used to assess skills training, product knowledge and eLearning effectiveness. Coracle-Quiz offers micro-credentials such as badges, built from structured (formal) and unstructured (informal) activities. Create and manage multiple choice, free text, drag and drop and other game based tests, in any language. Assess learners before they embark on a course and re-test at the end to monitor relative improvement in skills and to help close knowledge gaps.

Exam management from Coracle includes registering candidates to attend exam centres; managing space at exam centres around the world; opening relevant course content based on exam selection; tracking exam scripts with barcodes; processing and sending exam results and certificates, as well as notifying professional bodies for accreditation.

Adding Coracle quiz to Vet-Webinar significantly improved the learning opportunities we offer vets. Working with Coracle is very straight forward - Coracle Quiz offers an intuitive user interface and the translation capacity is a big bonus.”

**Florian-Cecil Herold**

Managing Director, Vet-Webinar

## ONLINE ASSESSMENT AND OUTSOURCED EXAM MANAGEMENT

### USER MANAGEMENT

Integrate with Osprey-VLE or use as a stand-alone module.

### ANALYTICS

Dashboard overview and live reports for users and admins

### ANY DEVICE

Cloud based and secure. No internet: No problem!

### OUTCOMES

From formal accreditation to informal progress assessments, Coracle support your organisation.
